HSC-Y

40 arcsec

This is a deep-field astronomical image in the HSC-Y filter. The central feature is a bright, yellowish-white galaxy with a complex, multi-lobed structure. A white circle is centered on the galaxy, and a white vertical rectangle is overlaid on it, highlighting a specific region. The background is a dark blue field with numerous faint, distant galaxies. A horizontal white line in the lower-left corner indicates a scale of 40 arcseconds.
