

$$G_{\text{Gaia}} = 07.50$$

HSC-G

266 arcsec

This figure shows a deep-field astronomical image from the Hyper Suprime-Cam (HSC) in the G-band. The image is dominated by a dark, noisy background with a central, very bright yellow-white source. A large white circle is centered on this source, indicating a specific region of interest. In the bottom left, a horizontal white line serves as a scale bar, labeled '266 arcsec'. The text 'HSC-G' is in the top left, and the Gaia magnitude $G_{\text{Gaia}} = 07.50$ is at the top center.
