HSC-R

430 arcsec

This is a deep-field astronomical image in the HSC-R filter. It shows a dense field of galaxies. A large, bright, yellowish-white elliptical galaxy is the central focus, surrounded by a complex, multi-lobed structure of smaller galaxies and diffuse light, indicating a galaxy cluster. A white circle is drawn around the central region. In the bottom left, a white horizontal line indicates a scale of 430 arcseconds. The background is dark blue with numerous small, distant galaxies.
