

$$G_{\text{Gaia}} = 07.50$$

HSC-R

266 arcsec

The image shows a deep-field astronomical observation in the HSC-R filter. A bright, saturated yellow star is located at the center. A large white circle is centered on this star, representing a specific field of view or aperture. The background is a dark blue field filled with numerous faint, distant stars. In the bottom left corner, a white horizontal line serves as a scale bar, labeled '266 arcsec'.
