

$$G_{\text{Gaia}} = 06.50$$

HSC-G

315 arcsec

The image is a square astronomical field of view. At the center is a bright, circular, yellow-white source, likely a star, with a soft, diffuse glow. The background is a dark, deep blue-purple, speckled with numerous small, faint, multi-colored points of light (galaxies or distant stars). A large, thin white circle is centered on the bright source. In the lower-left quadrant, there is a horizontal white line segment. The text 'HSC-G' is in the upper-left, and '315 arcsec' is above the line segment. The equation $G_{\text{Gaia}} = 06.50$ is at the top center.
